

GROUP FUNERAL SCHEMES

Whether it is the workplace, church or social club, you are stronger as a group, hence you get things done and achieve results.

Every person in your environment is very important, as they contribute to the wellbeing and sustainability of the organization. You can be seen to care and appreciate them by being there for them or their family when they need you most when death strikes.

Responding to a death situation can be very expensive without Group Scheme, employees/members having individual funeral policies can equally be very expensive, even when as the employer/church/social club steps in to assist from your own coffers, it is still expensive with a potential of unaffordability.

Death can happen when as a small business or church you have financial constraints, when your bank balance is low as a society. We empower you to be there when your employees/members and their families need you most.

WE HAVE THE SOLUTION FOR YOU.
